Cedar Lake Parks & Recreation

The new Parks and Recreation Board developed a short survey they would like everyone to participate in taking. The survey can be found at: <https://cedarlakein.org/departments/parks-rec/parks-recreation-surveys/> If you do not use the Internet, a written copy of the survey can be completed at Town Hall. It may also be picked up, completed at your leisure, and returned to Town Hall.

From the Desk of Chris Salatas, Town Manager

First, may you have a safe and happy Independence Day!

We currently have many projects underway all over town, but the most exciting one has been decades in the making: **The Lake Eco Restoration Project**. The Town hosted a Sediment Dewatering Facility (SDF) Ground Breaking Ceremony on Town Grounds on June 6th. A video of the event may be viewed on our Website and Facebook page. Enjoy the photos, and enjoy your summer!

Safety in or near the Lake

- Ensure every member of your family learns to swim so they at least achieve skills of water competency: able to enter the water, get a breath, stay afloat, change position, swim a distance then get out of the water safely – this is not your home pool!
- Employ layers of protection including barriers to prevent access to water, life jackets, and close supervision of children to prevent drowning.
- Know what to do in a water emergency – including how to help someone in trouble in the water safely, call for emergency help and CPR.
- Always enter unknown or shallow water feet first.
- Watch out for currents, waves, and underwater obstructions – they're not just found in the ocean.

If a child is missing, check the water first: seconds count in preventing death or disability!

Know What to Do in a Water Emergency

Recognize the signs of someone in trouble and shout for help. A swimmer needs immediate help if they:

- Are not making forward progress in the water.
- Are vertical in the water but unable to move or tread water.
- Are motionless and face down in the water.
- Rescue and remove the person from the water (without putting yourself in danger).
- Ask someone to call emergency medical services (EMS). If alone, give 2 minutes of care, then call EMS.
- Begin rescue breathing and CPR.
- Use an AED if available and transfer care to advanced life support.
